(54) COMMUNICATION APPARATUS

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a communication apparatus capable of immediately informing even hearing handicapped people about reception of image data or electronic mail.

SOLUTION: A control section 14 controls an ultrasonic wave generating section 10 after the end of facsimile reception to allow the ultrasonic generating section 10 to generate a signal in a particular frequency unable to be heard by people but able to be heard by service dogs and to allow a speaker 12 to externally sound the signal in the particularly frequency.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's

decision of rejection]

[Date of extinction of right]
